

## EasySubli™ Heat Transfer Vinyl

The latest innovation in garment sublimation is here! EasySubli™ is a brand-new HTV by Siser® that allows you to print custom, full-color designs using your sublimation printer.

*EasySubli* can be fed directly through a sublimation printer, which eliminates the need for transfer papers. After printing, it is recommended that you allow the inks to dry for 2 hours before masking, or you can lay your design underneath an open heat press platen for about 45 seconds.

While traditional sublimation is limited to white polyester garments, *EasySubli* can be used with a variety of different fabrics and colors. *EasySubli* is also applied at a low temperature of 311°F, compared to 380°F and above for traditional sublimation.

*EasySubli* is designed to work with virtually any sublimation printer, however, we recommend Sawgrass machines and the specially formulated *Siser EasySubli* Inks by Sawgrass for best results.

**Thickness:** 220 microns

**Applies to:** 100% Cotton, 100% Polyester, Poly/Cotton blends

**Temperature:** 311°F/155°C

**Time:** 15 seconds

**Pressure:** Medium

**Peel:** Warm

### Laundering:

Wait 24 hours before first wash.

Machine wash warm or cold with mild detergent

Dry on low dryer setting

Do not dry clean or bleach

Wash inside-out for best results
