

## FAT-MAT INSTRUCTIONS

**The tape-less, clamp-less and vacuum-less way to hold your work piece!** Our Fat-Mat will secure materials such as plastic, brass, acrylic, marble, aluminum, and more for fast and effective engraving and lasering applications. Fat-Mat eliminates sticky residue on engraving materials.

## The Fat-Mat Engraving Table Mat

### Fat-Mat Instructions:

1. Clean your engraving table of dust, oils, engraving chips, etc.
2. Adjust your spindle travel to allow for depth of mat.
3. Optional: Lay a strip of low tack Doublesurfaced tape on your table. Place Fat-Mat, acrylic side down, on tape or table.
4. Place engraving material on top of Fat-Mat and begin engraving.
5. Remove engraving material from mat and repeat process.
6. Clean Fat-Mat regularly with rubbing alcohol and a lint-free cloth. This helps keep your mat in its original form and engraving to the accurate depth.
7. Fat-Mat has a 9 to 12 month life expectancy with proper care and daily cleaning.
