

## UV LED Printing Saddle Collection

Offering the feel and appearance of genuine leather the Saddle Collection is a water resistant, textured, synthetic material that can be UV LED printed to offer a unique detail.

### Fabrication Process

- When UV Led printing on Saddle Collection, it is recommended to keep artwork as simple as possible to minimize risk of warp or other surface damage.
- If your printer allows for the UV lamps to be adjusted, we recommend turning them down 50% to minimize excess heat.
- It is not necessary to wipe down or use adhesion promoter on these products.
- To ensure equipment safety, focus to highest surface point of the product you are printing.
- Follow your standard printing operation procedures.

**Note:** Process noted above are intended as safe guidelines and may need minor adjustments to achieve optimal results.

### Clean Up

- Remove product from printer and gently wipe with damp cloth.
