

SIMPLY STANDOFFS

Everything you need to mount signs, artwork and displays. Made in the USA from precision aluminum, Simply Standoffs will add a secure, finishing touch to all your projects.

Here is How To Assemble Your Kit

We recommend 3/8" holes in your material to allow more freedom for aligning your panels.

- Level material and use 3/8" holes in the material as a template to mark the mounting surface.
- Pre-drill 1/4" holes in the mounting surface. Insert nylon anchors into the holes and tap them flush.
- Drive oval head screws through barrels and into nylon anchors until barrel is snug to surface.
- Screw threaded studs into barrels. Place your panel in position and thread on caps until tight.

WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer. For additional information go to www.P65Warnings.ca.gov
