- + The Digital Knight DK20S is a 16x20 swing-away heat transfer press. The DK20S combines a heavy-duty solid steel industrial grade pressing framework with accurate and easy to use technology providing operators with the best possible features needed for any type of project!

Known in the industry as the top-end robust workhorse of all swing away heat presses, the DK20S is able to fully thread garments from the *Front OR Back*, rotatable drop-on pull-pin attached tables, and allows for true Sleeve platens and anything else you can imagine.

You'll love how easy this press is to use, and your customers will love that each product you offer looks its very best!

DK20S Benefits

Two ways to thread!

The DK20S makes garments and apparel easy to complete with the ability to thread garments from the front or back.

Speed up your production with built in settings!

Offering 70 customizable memory settings, we take the guess work out of each press. You're guaranteed to speed up production and get the perfect press on any substrate, every time!

Precision presses every time, saving money on errors!

With the GeoKnight DK20S you'll get consistent, repeatable results with each and every press, reducing the amount of costly press errors and expensive reprints.
