

DECLARATION

Thank you for your recent enquiry relating Subliglaze & REACH regulation compliance. I can confirm to you that fully reacted coatings do not contain any SVHC's nor any other substances that have the potential to degrade or transform into SVHC's, including substances deemed to be:

- i) Carcinogenic, Mutagenic or toxic to Reproduction (CMR).
- ii) Persistent, Bio-accumulative and Toxic (PBT).
- iii) Very Persistent, Very Bio-accumulative (vPvB).
- iv) Very toxic to aquatic organisms, causing long-term adverse effects in the aquatic environment.

Our organic coatings are specially formulated to give inert, non-toxic, non-hazardous, durable finishes, complying with all European REACH legislation regarding external decorative and protective coatings.

Regards

Paul Hirst
